

Electrical Maintenance for Sites / Buildings (1 - 2 Day Course)

Delivered on your site anywhere in the UK

The content of this course will be customised to your requirements and case studies of your equipment will be covered during the course. Where possible practical work will be carried out on your own equipment.

Typical Participants: This course is intended for those people whose role involves the maintenance of buildings or sites. It is ideal for a person who needs to look after the first line maintenance in offices, retail outlets, schools etc.

General Information: It is typical that those people who would attend this course would not have electrical qualifications but would become involved in simple electrical maintenance including resetting circuit breakers, relamping, replacing damaged sockets etc.

Typical Content:

- Basic Electrical Units and Principles
- Fundamentals of Electrical Circuits
- Circuits in buildings and property (power, lighting etc)
- Electrical Circuit Protection, Fuse and Distribution boards
- Lighting circuits and equipment
- Appliances and Ratings
- Making Safe and Secure Electrical Connections
- The Dangers of Electricity and Safe Working Practices
- Electricity and the Law - An overview of regulations currently in force
- Understanding Limitations
- Use of test equipment to fault find
- Plant Room Maintenance
