

ELECTRICAL TRAINING COURSES

Electrical Safety Awareness Training (One Day Course)

Delivered at your location anywhere throughout the UK

The Electrical Safety Awareness Training Course is for those people who need to work on electrical equipment who either have no electrical qualifications or those who need a reminder of electrical dangers and safe working practices.

Typical Participants: Any person who needs to carry out electrical tasks from the simple to the more complex who should be fully aware of electrical dangers and how to work safely.

General Information: This course will be customised to your requirements and will relate to the type of activities that people need to carry out. The course attendees will be assessed upon completion of the course so that you can be assured that they have learnt. The course will be certificated as 'Successful Completion' and will therefore be invaluable for health and safety purposes.

Typical Content:

- Electrical Quantities and Units
- Simple Electrical Circuits
- Electrical Supplies (DC, Single and Three Phase)
- Electrical Circuit Protection Methods (Earthing, MCBs, Fuses, RCDs)
- Typical Electrical Hazards
- Safe Working Practices including Electrical Isolation
- Making Safe and Secure Electrical Connections
- Electricity and the Law - An overview of regulations.

Course costs are dependent on your location and the number of attendees.

Tinson Training delivers courses to a wide selection of UK businesses, delivered on site and customised to ensure that it meets the exact needs of the attendees.
