

ELECTRICAL TRAINING COURSES

Office Electrical Awareness Training (Half Day Course)

Delivered at your location anywhere throughout the UK

The Office Electrical Awareness Training Course is a course appropriate for someone looking after electrical equipment in an office environment.

Typical Participants: Any person who has the responsibility for the safe keeping of office equipment who may need to resolve electrical problems on occasions.

General Information: This course will deal with typical office equipment and problems although it will cover any specialist equipment if necessary. The course attendees will be assessed upon completion of the course so that you can be assured that they have learnt. The course will be certificated as 'Successful Completion' and will therefore be invaluable for health and safety purposes.

Typical Content:

- Electrical Quantities and Units
- Simple Electrical Circuits - how they work
- Single Phase 230V supply
- Protection from Excess Current (Circuit Breakers and Fuses,)
- Typical Electrical Hazards and Safe Working Practices
- Protection from Electric Shock (Earthing and RCDs)
- Common Electrical Problems - their symptoms, causes and remedies
- Understanding energy demands and electrical power consumption
- Inspecting and Testing Electrical Equipment
- Electricity at Work Regulations 1989

Course costs are dependent on your location and the number of attendees.

Tinson Training delivers courses to a wide selection of UK businesses, delivered on site and customised to ensure that it meets the exact needs of the attendees.
